2002 DISTINGUISHED BUSINESS LEADERS' AWARD DINNER

On Wednesday, October 30 in historic Woodrow Wilson Hall, the Distinguished Business Leaders' Award was given to Laurence M. Downes, chairman and CEO of New Jersey Resources, parent company of New Jersey Natural Gas Company (NJNG), and to the management team of NJNG and affiliates.

"As New Jersey Natural Gas Company celebrates its 50th anniversary, it is fitting that we honor Mr. Downes and his management team for their years of achievement and dedication to customers, community, and stakeholders," said Rebecca Stafford, president of Monmouth University. "These individuals exemplify corporate leadership and have a long-standing commitment to achieving excellence."

NJNG is one of the fastest-growing local distribution companies in the United States and the principal subsidiary of NJR, a Fortune 1000 company, which provides retail and wholesale energy services to customers in New Jersey and in states from the Gulf Coast to New England, and Canada. NJNG provides energy services to more than 430,000 residential, commercial and industrial customers in New Jersey's Monmouth and Ocean counties and parts of Morris and Middlesex counties, and maintains a nearly 6,000-mile underground pipeline system. The Company has added nearly 12,000 new customers for the past eight consecutive years, representing 2 billion cubic feet of new firm throughput annually. Other major operating subsidiaries of NJR include NJR Energy Services and NJR Home Services.

Led by Mr. Downes, the management team includes: Oleta J. Harden, senior vice president, general counsel and secretary; Glenn C. Lockwood, senior vice president & CFO; Deborah G. Zilai, vice president-Business Transformation and Technology; for New Jersey Resources: Gary A. Edinger, senior vice president- Energy Delivery; Thomas J. Kononowitz, senior vice president-Marketing Services; Kevin A. Moss, senior vice president-Regulatory Affairs; Barbara C. Roma, vice president-Customer Services; Joseph P. Shields, senior vice president-Energy Services; for NJNG: Hugo Bottino, vice president-Human Resources; Timothy C. Hearne, Jr., senior vice president and treasurer for NJR Service Corporation; and Wayne K. Tarney, president-NJR Home Services.

28TH ANNUAL CHRISTMAS BALL

Historic Woodrow Wilson Hall was again the setting for the annual Christmas Ball and Celebration of Trees on Saturday, December 7, 2002. The event was sponsored by the Monmouth University Library Association in cooperation with the Monmouth University Business Council.

The Christmas Ball transformed Wilson Hall into a winter wonderland with spectacular Christmas trees surrounding the dance floor, great staircase, and bandstand. The black tie event featured dinner, dancing, cocktails, a cash raffle, and a silent auction.

THE NEW DIRECTOR/CHIEF OF POLICE

William McElrath is the new Director/Chief of Police effective January 15, 2003. As Director/Chief, Bill will be responsible for the oversight of all law enforcement and related activities at the University.

Bill holds a Bachelor of Arts degree in Criminal Justice from King's College in Wilkes-Barre, PA and a Masters of Education from Seton Hall University.

Prior to joining Monmouth, Bill was employed as a Detective Captain with the Paterson Police Department, where he served as Commanding Officer of the Criminal Investigations Division. In addition, he is an adjunct professor at both Passaic County Community College in New Jersey and John Jay College of Criminal Justice in New York.

Monmouth University's Master of Arts in History

History's Relevance

is found in the lessons it teaches. — THOMAS JEFFERSON

"My work at Monmouth developed my research and writing abilities, providing marketable skills that gave me a great advantage in my career."

JAMES R. STEVENS, JR.
M.A. in History, concentration in American History
Lead Interpreter, Cold Springs Village, New Jersey
Consulting Historian, New Jersey Network

Whether you wish to specialize in **European History**, the **History of the United States**, **Industrialization and World Civilizations**, or prepare to pursue a **doctoral degree**, Monmouth University's M.A. in History programs have what you're looking for. If you have a general interest in the subject of history, you may elect to pursue a more broad-based program with the option of taking a comprehensive exam instead of a master's thesis. Monmouth's history programs are designed not only for recent college graduates but also for secondary school teachers of history and social studies and professionals in government, the military, and business.

ROSATO EARNS ACADEMIC ALL-AMERICA STATUS FOOTBALL STANDOUT BECOMES FIRST MU FOOTBALL PLAYER TO EARN HONOR.

Monmouth University standout Justin Rosato (Old Bridge/St. John Vianney) earned national recognition on Tuesday as he was tabbed to the first-team Verizon Academic All-America University Division Football Team.

Rosato, who owns a 3.88 grade-point average in business finance, started all 10 games as a defensive back for the Hawks. The senior led Monmouth in pass breakups on the season with eight. He also ranked third on the team in tackles with 56, including 33 solo takedowns. On the season, Rosato also recorded one forced fumble and one sack.

Rosato twice earned first-team Verizon Academic All-District II honors and was a three-time member of the Northeast Conference Academic Honor Roll.

In a stellar career, Rosato appeared in 31 games for the Hawks and started all 20 games during his junior and senior campaigns. He logged 161 tackles and 13 pass defenses while in the Blue and White.

Other notables on the Academic All-America squads included Heisman Trophy candidate Kliff Klingsbury of Texas Tech (first-team quarter-

back) and Craig Krenzler (second-team) quarterback of Fiesta Bowl and National Championship game participant Ohio State University.

In earning the award, Rosato became the first Hawks' football player to earn the prestigious honor and the fourth athlete at Monmouth to earn the award. Monmouth's last Verizon Academic All-American was Greg Landis, who earned second-team status in baseball for the 2001 season. Ellen Brennan earned third-team recognition for women's basketball in 1988 and Dave Calloway was tabbed third-team for men's basketball in 1990.

MONMOUTH PAIR EARNS NEC SCHOLAR-ATHLETE HONOR

Rosato and Wroblewski recognized for athletics and academics excellence. Cheryl Wroblewski, Brick, and Justin Rosato, Old Bridge, were honored as the 2002 Northeast Conference Fall Scholar-Athlete award winners this past December.

Wroblewski, a senior midfielder, is recognized for her efforts in women's soccer. Wroblewski earned second-team All-Northeast Conference honors for the third year in a row after she ranked second on the Hawks in scoring with 13 points (six goals, one assist). She scored twice in Monmouth's 3-2 overtime victory over Fairleigh Dickinson in the NEC Tournament semifinals, including the game-winner in the 101st minute. A three-time member of the NEC Academic Honor Roll, Wroblewski maintains a 3.54 grade-point average as a special education major.

Rosato, a senior free safety, is the winner of the scholar-athlete award for football. Rosato recently became just the fourth student-athlete in Monmouth history to earn Verizon Academic All-America recognition when he was named a first-team defensive back. This followed his selection to the Verizon Academic All-District II team for the second straight season. Rosato ranked third on the Hawks with 56 tackles, including 33 of the solo variety. He also broke up eight passes and had six tackles for negative yardage. Off the field, Rosato spent the past two summers completing internships at Johnson & Johnson World Headquarters in New York and a Merrill Lynch. He is a business finance major who has compiled a 3.89 grade-point average.

All Scholar-Athlete award winners must have earned a minimum of 60 semester hours, maintained a minimum cumulative grade-point average of 3.20, and have participated with distinction as a member of a varsity team.

Monmouth also had 34 athletes named to the 2002 Northeast Conference Fall Academic Honor Roll. The Academic Honor Roll is comprised of all student-athletes, who participate in a sport and possess a 3.20 or better cumulative grade-point average after spending at least one year at the institution.

Monmouth University's Master of Social Work (M.S.W.)

The confidence to change lives

"Confidence...you need it as a social worker, and it was the most important asset I gained through earning my graduate degree from Monmouth. Since graduation I have also been promoted to a supervisory position within my agency. I've grown as a person and a social worker."

JENNIFER DUFFIELD, M.S.W.
Legal Program Coordinator
Providence House of Catholic Charities

Students in Monmouth's Master of Social Work program choose from two areas of concentration: **Practice with Families and Children** and **International and Community Development**. Both concentrations combine classroom and fieldwork so that students develop a broad understanding of human behavior and social policy, as well as extensive practical experience. The family and children concentration prepares students to deal with family health issues and the aging population, and leads to private practice. The international and community development concentration prepares students for grass-roots organization, work in public agencies, as well as for international social work careers. CSWE accreditation.

THE GOVERNOR ADDRESSED THE NJ LABOR DEPARTMENT ON CAMPUS

October 11, 2002: L-R: Mayor Adam Schneider, City of Long Branch; Long Branch Councilman, John "Fazz" Zambrano; Mary Anne Nagy, VP for Student Services; Governor James E. McGreevey; mayor Paul Zambrano, Borough of West Long Branch; and Susan Doctorian, Assoc. VP for Public Affairs.

ASSISTANT DEAN FOR THE SCHOOL OF SCIENCE, TECHNOLOGY AND ENGINEERING RECEIVES AWARD FOR OUTSTANDING PUBLIC INTEREST CONTRIBUTIONS

The Monmouth County Water Resources Association awarded John A. Tiedemann the 2002 "Carmen Stoppiello Good Neighbor Award" for a unique individual effort contributing directly to the public interest at the 12th Annual Monmouth County Water Resources Association Awards Luncheon held on October 25, 2002, at the Molly Pitcher Inn in Red Bank.

"This is a significant recognition, and I am honored that my contributions have benefited the community," said Tiedemann, assistant dean for the School of Science, Technology and Engineering at Monmouth University. "Monmouth University has served as a great facilitator for water resource projects in the surrounding communities."

As a "good neighbor" to surrounding communities, Tiedemann's concentrated efforts have mobilized Monmouth University students to actively participate in water resource projects throughout the county. This year alone, he organized stream cleanups of Whale Pond and Poplar Brooks, coordinated DNA sampling for fecal isolation in the Manasquan and Shark River watersheds, and hosted water resource workshops with the Rutgers Cooperative Extension Service.

Through Monmouth University's "Partners in Learning" program, Tiedemann, a life-long resident of Point Pleasant, has been conducting "Limnoecology of Whale Pond Brook," an after school program that educates elementary students in the Asbury Park and Long Branch areas about stream ecology and methods of protecting against stream contamination.

PART 4: INTERNSHIPS

BY CATHERINE LEIDEMER

FROM BACKPACK TO BRIEFCASE:

IN-TERN

Pronunciation: (ɪn'tɜrn) n.

1. A student or a recent graduate undergoing supervised practical training.

--The American Heritage® Dictionary of the English Language: Fourth Edition (2000)

It's a term you most likely know well, especially if you're a college student. And if you want to make the most of your collegiate experience, intern is a term that you'll make sure applies to you at some point in your college career.

That is, of course, only if you want to a) make sure the major you've chosen is the right one for you, and b) get a leg up on the competition once you're ready to enter the working world after graduation. Sure, you learn a lot in the classroom. But whether you're confident that you've chosen the right major or you're not yet sure what you want to do "when you grow up," practical experience in a field or industry can be invaluable.

"It gives students the opportunity to test their skills and to find out whether or not they like a particular field," says Bea Rogers, associate dean of education and career planning in Monmouth University's Life and Career Advising Center (LCAC). Plus, she notes, employers are attracted to job candidates who offer practical, hands-on experience in the field. "Students with some type of work experience will be light years ahead of those without experience upon entering the working world," she continues.

"Through this type of experience, students will often acquire a large network of contacts and an opportunity for work after graduation," adds Saliba Sarsar, Monmouth's associate vice president for academic program initiatives.

Haven't thought about it yet? Don't put it off--there's no time like the present to plan for your career and your future.

DID YOU KNOW?

Monmouth students are required to participate in the Experiential Education Program ("Ex Ed"), which assists students in finding opportunities to apply what they've learned in class to a career-related experience. "We're training our students to gain experience in the world of work," says Sarsar. "This program, which began in 1997 and has since become a national

model for similar programs, is a core general education requirement. It involves students in the community and gives them exposure to the world."

Sarsar notes that only 12 percent of college and universities across the country enforce a similar requirement for their students, establishing Monmouth as a leading institution in preparing students for life after graduation. The highly structured program is supported by a strong network of faculty, staff and employers who work together to ensure each student's participation in an educational and informative work experience that pairs a student's interests with a prime opportunity for academic, career and personal growth.

IT'S NEVER TOO EARLY

Why put off planning for work experience that will only help improve your resume and solidify—or help you realize it's time to change—your career choice? Granted, during your first month as a freshman, you're still getting settled into the college routine and probably aren't quite ready to think about what you'll be doing next week, much less after graduation. On the other hand, some students wait until the last possible semester to pursue any sort of internship, co-op position or other work experience. By that time, the experience will no doubt still be valuable, but it doesn't leave much time to explore other career options if it turns out that a chosen pursuit isn't the right fit after all.

"We try to encourage students to think about their major and their possible career choice during their freshman year," says Rogers, who, along with several other LCAC staff members, offers indispensable advice and services to students as they work on preparing for a career. "We start looking at career opportunities from the time students come in the door so they can at least see what's available," she continues. Rogers and her staff also make sure students are aware of the LCAC's other helpful career services, including resume and interviewing workshops, in order make sure they're ready to hit the ground running.

Exactly when a student fulfills the Ex Ed requirement can depend on several factors, including the student's major, the type of experience in which he or she is interested and the competitiveness of that particular position, says Rogers, but it is most common for students to be in their junior or senior years.

SO MANY CHOICES . . .

Monmouth students are hardly limited when it comes to options of where and how to complete the Ex Ed requirement. There are many tough decisions ahead: internship, co-op or service learning? Paid or unpaid? A large corporation or a small nonprofit? During the school year or over the summer? How many hours and days per week? The possibilities can be overwhelming, which is where faculty and the LCAC staff come in handy.

A faculty member in each department is designated as a Career Advisor and Planner (CAP) and serves as the coordinator for the department's Ex Ed requirement. Students begin the process of looking into Ex Ed options by meeting with either a CAP or with a LCAC staff member. "Students come to us in the LCAC and we help them figure out which opportunities are the best for them," says Rogers. "The main things we do are to familiarize students with the Ex Ed search engine and get their resumes going. Our goal is to get the best possible experiences for our students."

Students then search for placement listings that are of interest and follow the given instructions, which often list a contact person—either a CAP or an LCAC staffer—for the student to see for more information. Students can receive assistance with drafting a cover letter, and the LCAC staff then faxes the student's cover letter and resume to the appropriate contact at the targeted organization.

There is no shortage of Ex Ed options from which students can choose. Sarsar explains that the program is broken down into five categories of Ex Ed opportunities: internships, co-ops, service learning, class projects and study abroad. The options can be confusing, and Sarsar offers an explanation of each:

- » **Co-op:** Students obtain a paid work experience and work with a faculty member to create learning goals for the duration.
- » **Internship:** Students supplement an unpaid work experience with an academic assignment, such as a research paper connected to the experience, under the guidance of a faculty member.
- » **Service learning:** As part of a designated Ex Ed course, students first learn skills in class and then apply those skills to a community-service project. For example, students might learn how to teach English as a second language (ESL) in class and then teach ESL to a community group.
- » **Class projects:** A course is built on the pretense of students working, as a class, on a project for a community group. For example, a class project might involve students building a Web site or forming a business plan for a nearby company. This course is a requirement for most business students.
- » **Study abroad:** Monmouth offers increasingly popular study abroad programs, including semester-long placements in London, England and Sydney, Australia, as well as a summer program in Madrid, Spain.

The possibilities are endless, Sarsar notes. Past Ex Ed placements have found students working for companies from MTV and Walt Disney to Merrill Lynch, First Union and Lucent Technologies.

It does happen, he points out, that the occasional Ex Ed placement later results in a full-time job for a student after graduation. At the very least, students are "enhanced as professionals, as citizens and as leaders," Sarsar says. "This program helps make connections for students and for Monmouth University in the world of work and in the community, and all of us are the better for it."

DO YOUR HOMEWORK FIRST

Ready to join the Ex Ed workforce? Rogers recommends you follow a few basic steps to help introduce you to the program. "First, students should visit the Ex Ed Web site to educate themselves about the program," she notes. The site offers a comprehensive summary of the program, tips on preparing for the experience and student success stories, in addition to a database of possible Ex Ed opportunities. Students can access the search engine by using their regular Monmouth login and password and can search by area of study.

And, as always, the LCAC staff is available help students make the most of the Ex Ed program. The center's main number is 732-571-3458 and Rogers' e-mail is bea@monmouth.edu. Happy hunting! **MU**

ADDITIONAL RESOURCES

Now that you're prepared to start the hunt for an internship or another type of work experience, might we suggest that you take advantage of a few valuable resources we've found. Between the LCAC, the library, your local bookstore and the Internet, you have a vast selection of opportunities at your fingertips—all you need to do is start reading, and then investigate those that sound the most attractive. Below, we've listed a few of the more helpful books (all are available at www.amazon.com) and Internet Web sites that will put you on the right track and help you find an opportunity that best suits you.

Books

The Back Door Guide to Short-Term Job Adventures: Internships, Extraordinary Experiences, Seasonal Jobs, Volunteering, Working Abroad, third edition, by Michael Landes (Ten Speed Press, 2002). For those adventurous types who are looking for out-of-the ordinary experiences, this is your resource. Learn about more than 1,000 unique opportunities to intern or volunteer across the United States and internationally. If you don't want to be stuck behind a desk this summer, you'll find an alternative here.

The Insider's Guide to Political Internships: What to Do Once You're in the Door, edited by Grant Reeher and Mack Mariani (Westview Press, 2001). Political internships are prestigious and always in demand, drawing thousands of students to Washington, D.C., and state capitals each year. Let the well-informed editors of this guide show you how to make the most of the experience, and take advantage of advice from former interns and from politicians who have supervised interns.

The Internship Bible 2002, by Mark Oldman and Samer Hamadeh (Princeton Review, 2000). Billed as "the biggest, most up-to-date source of internship information available anywhere," this book gives you the inside scoop on landing internships with prestigious companies, including CBS News, Merrill Lynch and the White House. Plus, the authors offer handy advice on how to pursue an internship.

Internships for Dummies, by Craig P. Donovan and Jim Garnett (John Wiley & Sons, 2001). Yes, the well-known "For Dummies" series has a book for every purpose. Not surprisingly, the authors (from Kean University and Rutgers University, respectively) provide a valuable resource for anyone seeking an internship. Learn how to decide on the right

opportunity for you, as well as how to prepare for the interview, have a successful internship and possibly turn the experience into a job.

Peterson's Internships 2003, 23rd edition (Peterson's Guides 2002). The trusty folks at Peterson's are good for more than just guides to colleges; here, you'll find information on more than 50,000 paid and unpaid internships in the United States and abroad. They'll fill you in on internship do's and don'ts, too.

Websites

CareerPlanit (www.careerplanit.com)

Point your Web browser to this site and search through an extensive database of internship opportunities by size, location, industry, salary or other qualifications. The "Resource Mining" link even gives you an idea of the average salary for internships in a variety of fields and offers a slew of helpful articles, such as one that clarifies the difference between an internship, co-op and a job shadowing experience.

Monster.com (www.monster.com)

Go to this always reliable job site and click on the "MonsterTRAK" link to access a huge database of internships. Post your resume, practice with a virtual interview or, for alumni, register to become a career contact for current students. (Hint: The password you'll need to access the database is "hawks.")

Wetfeet.com (www.wetfeet.com)

This Web site is a veritable gold mine of information, whether you're searching for an internship or your first job. Research a particular company, learn the job requirements for a specific career and tap into the "Internships" link, which provides endless help in the form of several informed articles and a link to the Internshpprograms.com search engine.

Smile You're on MU Camera

BY CATHERINE MOSCARELLO

When you walk through the main doors of the new Jules L. Plangere, Jr. Center for Communication and Instructional Technology, be prepared to smile for the cameras. It may not look like you're in a television studio, but the entire building is functional as a set. In one of the most unique design features of this newest facility on campus, the building was created to take on the function of a working studio via line connection points placed throughout the corridors and lobby. This enables students and faculty to tape and/or broadcast material from any point in the building, just as if they were physically within the well-equipped Monty TV Film Studio situated at the heart of the CCIT.

The studio is named for industry pioneers Gloria Monty O'Byrne and Norma Monty, best known for their work with *General Hospital*. Gloria won two Emmys for her work as Executive Producer of the Daytime Serial, which was near death by low ratings until she resuscitated it with snappier dialogue and updated situations. Starting in 1978, she breathed new life into the show by developing the characters Luke and Laura. With sister Norma as head writer, each

the structure. "We actually wanted two TV studios so that we could work on two projects at the same time. With this design, we have a studio within a studio. We're very excited with the results."

And what a studio it is. Shoulder to shoulder with the industry's standards, the two story high, 40' x 60' studio has capacity for four separate sets, room to "fly" lighting and equipment and to move any set around, along with storage facilities for sets while not in use.

Jules L. Plangere, Jr. at the dedication of the Center for Communication and Instructional Technology

day's episode was made into a mini-movie and the show set new standards by breaking all industry records. Both women lend their time and talent to the Monmouth University Communications Council and were involved in the planning of the studio.

Chad Dell, associate professor in the Department of Communication Studies, talked recently about having a wish list when he served on the Faculty Advisory Committee during the planning stages of

The main area where shows originate is what is known as a "dead room" with walls 12" thick made of sand-filled concrete block, painted black. Four movable drapes provide backdrops of gray, blue, and chromo-key blue; the latter allowing a Monmouth broadcaster to seem to be in some far-off land while safely seated in front of the camera.

Speaking of cameras, visitors inside the studio will notice four of them, two with Teleprompters, standing at the

“We’ve even entered into conversation with Long Branch Cable Commission for some projects and are considering student coverage of public affairs and special meetings.”

ready and looking a bit more humble than their \$35,000 price tags would suggest. “The stands for these cameras cost another \$15,000 each and so did the Teleprompters,” said Robert Cornero, associate vice president for Campus Planning and Construction.

Since teachable areas as well as production venues are necessary, the control room is more spacious than what you would find in a commercial studio and it’s also a bit brighter with natural light coming in through the windows. Five individual editing suites allow students

the space and science to do state-of-the-art Avid digital editing in a networked setting. Avid editing is a non-linear system, standard in the industry, that produces special effects such as dissolves or picture swipes or moving video within a still picture. Unlike linear editing of tapes where cutting and pasting produces the desired effect, Avid is more like editing on a CD where the user can go to a particular point in the piece to set up the edits.

There’s also a dressing room for the “talent”, the people in front of the camera, a soundproof voice-over studio, and a fully automatic keyboard control system for lighting.

“In the design phase, deciding on the equipment was the greatest challenge,” according to Cornero. Department of Communication Chair Don Swanson believes that challenge was met. Dr. Swanson explained that now students can transfer skills they learn at Monmouth of producing broadcast quality TV to a

The flexibility and versatility of the current design insures that no matter where the broadcast industry goes, Monmouth will be right in step with the changes.

future career. “We’ve even entered into conversation with Long Branch Cable Commission for some projects and are considering student coverage of public affairs and special meetings.”

The department is currently offering ten production courses per semester since the September opening of the CCIT. Participation in the student-run Hawk TV, a 24-hour 7-day-a-week cable channel, jumped from the usual 10 new students in the fall to more than sixty. Professor Dell said besides regular programming,

Hawk TV is working on a student written and performed serial or “soap opera” and plans are in the works for a woman’s interview show formatted along the lines of The View.

The Monty TV Film Studio can certainly boast of cutting-edge technology, but with the rapid advances in technology how can a program keep up? Cornero explained that the building was designed with the future in mind, “We’re prepared for a wireless setup here as well. Besides thousands of feet of cable and wire, the building has a complete fiber optic system in place for when that day arrives.” The flexibility and versatility of the current design insures that no matter where the broadcast industry goes, Monmouth will be right in step with the changes. **MU**

Apartheid's Landscape and Ideas

Alan Schwerin's book is a shining star of literature on South African culture

BY TOVA NAVARRA

In September 1977—more than four centuries after Bantu-speaking people settled in South Africa and explorer Vasco da Gama set eyes on St. Helena Bay—Steve Biko died from brain damage in a Pretoria prison cell.

Eastern Cape security police inflicted fatal blows to his head during the last of four times Biko was interrogated under apartheid anti-terrorism legislation. He was founder and martyr of the Black Consciousness movement that deplored oppressive apartheid politics. Stephen Bantu Biko was 31. Since he gave his life for the cause of human rights, he has been known around the world as a symbol of black resistance.

At a now-famous June 1976 demonstration in Soweto, Johannesburg, police fired at and killed more than 1,000 students protesting against “Bantu education” and the imposition of Afrikaans (the second official language of South Africa) as a medium of instruction. By the next month, the International Convention on the Suppression and Punishment of the Crime of Apartheid came into force, making apartheid a universally dirty word.

Dr. Alan K. Schwerin's book, *Apartheid's Landscape and Ideas: A Scorched Soul* (University of Rochester Press, Rochester, NY, 2001), is dedicated to all who would rise up like Biko, “those who sought for an open society in South Africa.” This the land of diamond and platinum mines, gold, copper, nickel, and iron deposits, farmland and forests;

the home of the Bantu, Zulu, Xhosa, Tswana, European, Anglican, Roman Catholic, Muslim, Asiatic; the southernmost country on the African continent; the only country long credited for the highest standard of living in all of Africa.

In his preface, Schwerin wrote that the book emerged from his desire to create a silent mosaic of stories, documents, ledgers, and journal entries culled from a vast repository of Afrikan literature: “While a variety of considerations have influenced my particular blend of selections—for instance, their internal consistency and their emotional appeal featured prominently in my decisions—the prime concern has been the document's bearing on the central issue of the book: namely, the evolution of apartheid.”

Despite that South African historians admit to the country's unflattering chronology from Day One that included everything from slavery, war, rebellion, massacres, and other horrors born of racism, it wasn't until 1948 that codified segregation by race—apartheid—became official. And the root of more suffering and destruction, instituted when Steve Biko was two years old. Schwerin asks the burning question: Why did authorities rely on this draconian system until the Security Council pressed them to revoke the decree in 1987?

“Apartheid,” Schwerin wrote, “the dehumanizing set of regulations that enslaved the vast majority of South Africans for almost half a century, rested on racist perceptions of the indigenous population. These perceptions are founded

on a racist and exploitative conceptual framework that is deeply embedded in the psyche of the advocates of apartheid... Central to these prejudices was fear: a concern that led many to argue for the need to protect the immigrant White community,” especially the Afrikaners (of Dutch, German and French descent).” But even the leading architect of the apartheid policy, Hendrik Fensch Verwoerd, of Amsterdam, knew that total segregation was not possible, because the white community largely depended on black labor and services.

Apartheid smacked of the Holocaust, the Berlin Wall, the Civil War, and the British oppression of India. Mahatma Gandhi first went to South Africa in 1893, and from 1907 to 1913 established a campaign of passive resistance there.

However, apartheid was a system, said Schwerin, that thrived even while morally repugnant and universally condemned, and “inhabitants of the new, democratic South Africa will have to come to grips with the vestiges of apartheid... imprints that history might prove to be indelible.”

Under such a cloud Schwerin decided to produce a beautiful, literary work that reveals some of the opinions, observations, and innermost feelings from South Africa's past, juxtaposed with his own stunning photographs—glimpses of the land under South African skies and near-abstracts of natural subjects.

“Fragments,” he called this book's parts all linked as a passionate sum. Born in Johannesburg, Schwerin earned his doctorate at Rice University and taught philosophy in the impoverished home-

land known as the Transkei. Before he immigrated to the United States with his family in 1985, he won both first and second prizes in South Africa's national photographic competition for university students. Currently chair of the Department of Political Science and Philosophy at Monmouth University, Schwerin chose pithy accounts of South African conditions and travels, including some by world-reknowned personalities. For instance, this excerpt, From My African Notebook, by Albert Schweitzer:

"Women here are objects of value. From the moment a girl is born, the family calculate her value as capital. From their youth up the natives are accustomed to view things in this light. When a white lady bore twin daughters at the Hospital and the babies were shown to the 'boy,' he could find nothing better to say to the father than, 'Now you're a rich man!'"

"The whole life of the African is governed by the money affairs connected with marriage. To earn the means to purchase a wife, from his sixteenth year onward he

seeks an opportunity to earn money. To gain this end, he must often decide to leave his village and take a situation somewhere under a white man. What he has put by after three or four years of this life is not nearly enough to pay for a wife. The price demanded is usually so high that it is more than a native can save by ten years of work. So he marries on the hire-purchase system. His father, or, if he is no longer alive, an elder brother must help him with the first payment and undertake to guarantee for the further installments. . . .

"The awkward thing is that when a man marries, he usually cannot get a final definite statement of what the whole price is to be, nor can he learn anything definite about the size of the installments and the dates on which they are due. From the side of the wife's family there begins a process of squeezing which goes on for years. The father of the young woman and his relatives have not the chief say in this affair. The girl belongs to her mother and her mother's brothers. It is these that get the greater part of the money."

Each segment, excerpted from the likes of *Afrikana* by Duff MacDonald (1882), *The Last Journals of David Livingstone in Central Africa*, J. Murray (1874), and *Travels in South Africa* by John Campbell (1815), is an engaging slice of life that contributes to a bigger picture of South African customs and interactions with missionaries, explorers, traders, and tourists. Various men and women in the 16th, 17th, 18th, 19th and early 20th centuries jotted down copious notes on their experiences, some of them poems, some of them ledgers kept on ships that went in and out of South African ports. Schwerin has also included a chronology of events in Southern Africa from before Christ to 1948, and a glossary of terms used in the segments. *Karree*, for example, is a drink, also known as honey beer, prepared from the syrup of the prickly pear. A *dorp* is a country town or village, or a derogatory term referring to a backward or unprogressive place. And *Grikuas* are a people of mixed race, descended from the

Hottentots, white settlers, and Bushmen. Whenever an author can introduce readers to new vocabulary, he or she has achieved much right there.

Before every chapter of excerpts is an introduction well endowed with South African history and perspective. Schwerin's deep concern for and intellectual fascination with his homeland emerge in these introductions. He quotes Pascal and Kant and many other philosophers and literary figures in whose works he sees mirrors of South Africa's struggles. Schwerin's 44 photographs give readers insight into the country's terrain and beauty. Among the black-and-white landscapes, still-lives, and seascapes are two portraits—Schwerin (his face obscured) behind his camera, and (on the book jacket) Schwerin holding his cat, Sam, both taken by his wife, Helen. Although a few portraits of South African faces would have added much to the readers' visual grasp on this exotic culture, the composition and design of the pho-

tographs in the book show a keen eye for detail.

Of the entire volume, Willem Landman, professor of medical humanities at East Carolina University, wrote: "For 350 years South Africa has been a melting pot of widely divergent peoples and of notorious ideas. In the 1990s it moved to the center of the world stage with its heroic efforts at peaceful transition and reconciliation. Alan Schwerin's book is a unique contribution to the corpus of work on this complex topic. The text makes for fascinating reading. For me, as someone fairly familiar with South Africa's sad and inspiring history, and with its wonderful landscapes and creatures, several of the primary sources Schwerin has discovered are profoundly moving."

With its 300-plus pages, *Apartheid's Landscape and Ideas* serves as a sturdy and artistically treated springboard for anyone interested in super-dramatic history and human rights before the time of Nelson Mandela *et al* and the Rivonia Trial, the United Nations' interventions

on behalf of anti-apartheid movements, and the World Conference to Combat Racism and Racial Discrimination in Geneva. Even the cover design that combines two of Schwerin's photographs, "Rock and Shadow: Coffee Bay" and "Tree Trunk Graveyard: Rorke's Drift, Zululand"—lends an air of mystery and seriousness to what awaits the reader beyond the cover.

Perhaps most memorable is that Schwerin does not attempt to solve the unsolvable problem of racism, but rather to enlighten and inform us of its depths, of its global reverberations. He offers a trove of many eyes' and ears' absorption of South Africa's character and how it maintained itself through time and unspeakable hardship. Here we humans all are, on this Earth after so many, many years, and we still have not learned how to get along! Schwerin's book is the gift of a loving soul, one of whom Steve Biko would have been happy to know. MU

For 350 years South Africa has been a melting pot of widely divergent peoples and of notorious ideas.

In the 90s south Africa moved to the center of the world stage with its heroic efforts at peaceful transition and reconciliation.

STILL **CRAZY**
AND **WONDERFUL**

AFTER TEN YEARS OF
MONMOUTH UNIVERSITY FOOTBALL

August 13, 1993 was a special day on the Monmouth College campus as (Coach Kevin) Callahan opened the first football practice in school history. Monmouth had existed since 1933 without end zones and yard markers. There were no linebackers in class, no tailgaters in the parking lot, and no activity on Saturday afternoons. The lack of such activity had become apparent to two alumni, John Kessler '69 and Donald Burnaford '72. They had both experienced the weekend exodus that turned the Shadow Lawn campus into a ghost town. The two met socially one evening at a college scholarship event and Monmouth football was conceived.

—Jim Reme
Monmouth Magazine, Fall 1998

As Jim Reme told the “birds-and-bees” version of how Monmouth University football was born, football historians will tell you about rugby, a British game played with many similarities to football that started in 1823 at the famous Rugby Boys’ School in England. Another relative of football is soccer, sometimes called “association football,” whose history dates back to 1820s England. Really kicking things off were students at Princeton University, who began playing what was then known as “ballown.” Using both their fists and their feet to advance the ball, ballown focused on one goal: getting the ball past the opposing team. No hard and fast rules there, however, unlike what we now know and love as football. And in the 1860s at Harvard, freshmen and sophomores played a version of football known as “Bloody Monday” (the games were held on the first Monday of the school year), probably so dubbed because a lot of fractures, torn ligaments, and bloody noses figured into the excitement. From 1869, when the first intercollegiate game was played between Princeton and Rutgers, football evolved into a national, professional multi-billion dollar business and an American passion.

In 1993, Monmouth University joined football history by making Kevin Callahan head football coach of its fledgling team. Callahan’s passion for the game and the school lent itself to keeping bloody noses to a minimum while raising Monmouth’s profile and school-spirit.

“Prior to coming to Monmouth I was an assistant coach at Colgate University (’84-’92), Wagner College (’81-’84), Syracuse (’80), and Albany State (’77-’79),” said Callahan. “To be charged with the task of building an entire football program from scratch was not only a great challenge, it was a lot of work. The transition was somewhat easy, however. Everyone associated with Monmouth was so positive, and it was easy to see that they all truly wanted the football program to succeed.”

Football, more than any other game, said Callahan, has the ability to rally together an entire campus community. “Saturday afternoons in the fall, with the tailgate parties, the bands and cheerleaders, and the thousands of families, alumni, and fans come together to watch the team in action are some of the most exciting times on any college campus,” he explained. “In fact, that exact community spirit is one of the underlying reasons football was started at Monmouth.”

Callahan salutes Monmouth’s progress over the last 10 years. “Obviously, recruiting the first class of players, actually playing the first game against Stonehill College (Easton, MA), and our first win over St. Peter’s College have ranked up there with the most memorable moments.” And memorable bloopers, of course. Callahan remembers the trip to play Robert Morris in Pittsburgh in 1994. “On the way home,” he said, “one of our two buses ran out of gas just as we were getting off 195 and onto the parkway. The entire team had to pile onto one bus for the final leg of the trip. It wasn’t very funny at the time, however!”

But never mind sweating the small stuff, according to Callahan. Just getting the team out on the field had its built-in Goliaths.

“Several problems came up as we were putting the program together,” he recalled. “What was important, though, was that everyone kept their eyes on the goal and not the temporary setbacks. Nothing was too big that it couldn’t be overcome. There is a trickle-down effect in all sports, and football is no different. Everything from the x’s and o’s to the uniforms is copied in one form or another.”

With that growth came increasing passion for the sport for both the team and the coaches...but the passion also grew for the fans.

“The ultimate fans are the ones who are always there, home or away, rain or shine,” Callahan said. “Don Burnaford, former member of the Board of Trustees, has only missed a few games in our 10-year history. I also look back to terrific players like Dan Sabella, Vinny Sasso, Terry Murphy, Rich Bargloski, Jim Varick, Nick Syzmanski, John Mendes, Cornell Key, Ryan Monday, Eric Platt and know they helped the passion for football grow.”

“I think the future of Monmouth University football looks really exciting. There is so much I could say that I don’t feel like I am doing the topic justice. But we are only 10 years young and growing. In my mind, the first 10 years represent the first phase of Monmouth football. Bigger and better things are yet to come.”

MC NEWS, December 1993
In Their First Season, Hawks Win Respect of Opponents and the Hearts of Fans

President Rebecca Stafford remarked prior to the start of the Hawk's first-ever football season that she would be satisfied if Coach Kevin Callahan and his team won just one game. After all, it was a brand new team and almost all the players were freshmen.

In the end, the Hawks gave her two victories, 200 percent of what was asked. Admittedly, both wins came by razor thin margins. Both were won in the final seconds on field goals by the redoubtable Randy Brewster.

The team finished 2-5, but that bare statistic doesn't tell the whole story. For though the victories were squeakers, so were almost all of the losses. The average margin of victory for opponents was just 7.6 points. Perhaps the most remarkable of all was the heartbreaking 13-7 loss to a powerful Wagner team.

The Hawks' season was victorious in other ways, too. In total, more than 17,000 fans came to see the Hawks play at home. Paid attendance for Homecoming against Hartwick was 6,233. The other games drew either near-or-over capacity crowds.

There was also the victory of the spirit. Hawks football brought an infectious excitement to the campus that it has never experienced. Without question this team, Monmouth's first, won the respect of its opponents and the hearts of its fans. The tradition, as they say, has begun.

THE CHANCELLOR,
Spring 1993 Building a Football Tradition
From the Ground Up

"The challenge of starting everything is not only all-encompassing," says Head Football Coach Kevin Callahan, "it can be overwhelming."

Callahan, who is charged with putting Monmouth College's first football team on the field in September, seems energized with the task. Yet, it is a daunting one.

Hiring coaches, recruiting players, scheduling games, ordering improvements to facilities, equipment - there are a million details.

If Callahan seems to be everywhere these days - taking recruits on tours of the library and Wilson Hall on weekends, checking in with the Admissions Office, talking to the press, and visiting high schools to tell coaches about Monmouth's program - that is because he and his assistant Terry Dow are working overtime to get the job done.

"When you think of it," he notes, "in any other recruiting year a team has to bring in 30 to 35 players. We have to bring in 75, but I'm looking at it as a positive. The thing we can offer a young man is an opportunity to compete, to play, to start right away. Every position isn't already filled by a junior or senior. I also tell them they will have a chance to help establish traditions."

As part of that tradition, Callahan is working to make Monmouth College the Shore's football team. The coach also believes that football will become part of everyone's college experience at Monmouth.

"I realize that some people have been skeptical about whether we can recruit or keep 75 players," he notes. "But I look at it from the point of view of why we can and why we will succeed."

MONMOUTH, Fall 1997
Sabella Sets Records and
Calls the Shots in Senior
Season

With the approach of his senior season at Monmouth, Dan Sabella '98 owns the quarterback section of the Hawk's record book. Already the most prolific signal caller in the University's short football history, he's looking to add to the numbers that will make his career a standard for Monmouth quarterbacks of the future and along the way bring his teammates and fans their first taste of post-season play. As articulate off the field as he is in the huddle, this marketing major and co-captain has all the tools to propel Hawk football to the next level.

Monmouth College News, September 1993
Football Electrifies Campus

There is a new sense of electricity in the air, a new pride on campus, and palpable excitement, all of which is attributable to one thing - football!

From the minute the players, all 110 of them, reported to camp August 13, football at Monmouth became more than just an idea, it was a reality. Even the first practices have brought out a crowd of parents, alumni, students, and the just plain curious.

"I was down there during the first week of practice, and what I saw really impressed me," said John Kessler '69, who with his wife, Henni Kantor Kessler '68, donated the funds for the construction of a new 3,000 seat grandstand and press box, which was nearing completion during the last week in August. "Everything looks very organized, everything was positive, everybody has really been up. I'm really excited!"

While at practice, the Kesslers had a chance to meet some of the parents of the players. "It was great to talk to the parents," said Mrs. Kessler, who noted that many of the players had been accepted at other schools but had opted to come play at Monmouth.

"In my short seven-year tenure of working with the Alumni Association and Board of Trustees, I have never felt the excitement or curiosity of people as I have felt recently," said Donald Burnaford '72, whom President Rebecca Stafford had dubbed "Mr. Football," for the key role he has played in making football a reality at Monmouth.

"It's a win-win situation," says Burnaford, a member of the Board of Trustees and president of the Burnaford Organization, a financial planning firm in Tinton Falls. "We have a program that will help keep students around on the weekends and we want to build some pride and tradition."

Burnaford and Kessler co-chaired the Monmouth College Touch-Down Club, which raised the initial start-up funds for the football program.

"We had a charter membership of 40 individuals and organizations," said Burnaford, who noted that the Touchdown Club exceeded its fund-raising goal of \$112,000. "The gift of the Kesslers really allowed us to have a first-class program from the start. That gift gave us a real jump ahead."

Monmouth University Press
Release, December 18, 2002
SENTIPAL EARNS
ALL-AMERICA STATUS

Junior Joe Sentipal, Hasbrouck Heights, earned national recognition on December 18 as he was tabbed to the 2002 American Football Coaches Association Division I-AA All-America team. Sentipal became the first player at Monmouth to earn the prestigious honor.

A two-time first-team All-Northeast Conference performer, Sentipal ended the season with 106 tackles, including 58 solo takedowns on the year. The junior linebacker also logged 8.5 tackles for loss of yardage and added two interceptions and four forced fumbles to his tally. Sentipal's best game of the season came in a 7-0 win over St. Francis. In the win over the Red Flash, he scored the game's only touchdown as he intercepted a pass and scampered 16 yards for the score. He also had a forced fumble, fumble recovery, and 10 tackles.

Earlier this season, Sentipal was recognized as the Northeast Conference Player of the Year. He became the second player in school history to earn the accolade and the first since Jason Gmitter garnered the award in 1997. A consistent performer, Sentipal earned NEC Defensive Player of

the Year honors despite not being recognized as Defensive Player of the Week at any point during the season.

Two years ago, Sentipal burst onto the scene with a school and conference record 15.5 quarterback sacks. During the campaign he also established a league record as he was tabbed NEC Defensive Player of the Week on four different occasions. He was sidelined for almost the entire season in 2001 with a case of mononucleosis before resurfacing this season.

For his career, Sentipal owns 222 tackles, which ranks seventh on the school's all-time chart. He also has 18 career sacks, second in school history. Although Monmouth has had 18 players named as All-Americans on the Division I-AA mid-major level, Sentipal becomes the first Hawks player to receive the honor as part of a team comprised of the entire Division I-AA.

Monmouth University Magazine, Fall 1998
Season Six for Hawks Football

Coach Kevin Callahan, starting his sixth season with an enviable 28-17 record, has been tremendously successful, as have his players. The Monmouth program boasts an excellent graduation rate and has turned out leaders in all walks of life. After graduating with a degree in criminal justice, David Lewis '97 returned and is a member of Callahan's staff. He coaches the defensive backs and serves as the coordinator of the Academic Support Center while he pursues his master's degree.

Vincent Sasso '98, another regular in the Hawk record book, is coaching in Bayonne. Ronald Polakowski '98 is at Howell High School. Two of the biggest offensive powerhouses in Monmouth history, quarterbacks Doug Rossback '96 and Dan Sabella '98, both talk of Callahan's administrative ability, the uncommon rapport with his players, the respect he gives them, and the respect he gets from them. Sabella is quick to tell you, "He's the best prepared coach I ever played for." The fact is that the players themselves are well prepared. Callahan and Monmouth are doing exactly what they intended to do — turning out winners on and off the field.

Charlie De Fazio '88

The Movie Man

"If I could stick a knife in my heart, spill it all over the stage. Would it satisfy ya? Would it slide on by ya? Would you think the boy is strange?" — Mick Jagger, "It's Only Rock n'Roll"

BY MIKE FARRAGHER '88

Since walking away from the Great Lawn in caps and gowns, our friendship has been held together by big lips, shaking hips, and hard driving rock-and-roll. We're on opposite coasts, yet we still manage to convene whenever the Rolling Stones hit the road. Now, eighteen years to the day we met one another, the Stones are at it again with their "Licks" tour.

So are we. We haven't missed a beat, so to speak. Our bond is rekindling in the fluorescent blue lights of my sensible German sedan. Though we are both older and grayer, the years melt away as the stories and laughs fly with each mile that passes on the Turnpike. A tape recorder hops between us like a nervous frog on a George Foreman grill.

"I used to get myself a pair of lemon yellow tights, capezios, and tank tops, and I'd dress as Mick Jagger," says Charlie Defazio '88, who is frantically gulping for air in between fits of raucous laughter. "I was imitating a character, playing a part, even back then."

Defazio has dug deep into his past to create his future. He is presiding over the release of *Hoboken Lou*, a film he wrote, co-produced, and acted. The movie is set in a very specific period in the actor's life, painstakingly chronicling the year before he left New Jersey to make a name for himself in Tinseltown. During that period, the actor was stuck in a cul-de-sac of bartending and auditions, with no way

out. Hoboken Lou falls for a woman in an unhappy relationship, and the two of them take risks by breaking out of their seemingly hopeless situations. Pop the corn and melt the butter, folks! This crudely produced film calls to mind the independent cool of *Clerks* with a dash of *Goodfellas'* Wiseguy swagger. The end result is a highly entertaining joyride through the streets of Hoboken.

His timing is perfect. The Hoboken theme of the film will allow Defazio to benefit from the white-hot spotlight that shows like *The Sopranos* have placed on the Garden State. While Defazio is aware of the raised level of awareness that the mob hit may bring to his project, he is cautious about jumping on a Jersey bandwagon.

"The interesting thing is that we never went into this thinking we were going to write something that was very Jersey," he says. "New Jersey is very in vogue at the moment with the popularity of *The Sopranos* and Springsteen's resurgence. I wrote the treatment seven years ago, when I was out in California. I didn't know anyone, and I was finding it impossible to deal with the certain types of people out there. It was so different out there. So I went back to the period of my

"Never settle for the ordinary... dream on."

life, a year before I decided to move to California, and I wrote about the family and our lives at that particular time. Now New Jersey is back with a vengeance and the timing for this movie is great."

"Never settle for the ordinary," says Defazio. "'Dream on.' That's actually the tag line, the slogan we put on the movie poster. If you have a dream or idea, it's important to give it a shot and

don't settle for anything less. If you don't succeed, at least you've given it a shot in your short lifetime."

Defazio's persistence paid off. Since graduating from Monmouth in 1988, Defazio has acted in a number of TV spots, as well as roles in *Felicity*, *Invisible Man*, *Maggie*, and *Chronicles*. He's worked with some great directors, including John Woo during filming of *Red Skies*.

Defazio blossomed as an actor while at Monmouth, taking roles in most of the plays that the institution produced. He is grateful for the Theater curriculum at Monmouth, and still employs the lessons learned onstage of what's now known as the Lauren K. Woods Theater.

"Monmouth taught me how to deal with an audience and not be afraid of an audience," he says. "By that I mean 250 people in the theater or three casting directors who are watching your auditions and are making decisions on your future. I learned how to get up and deal with that kind of scrutiny. I met some great people in the theater that I am still in touch with to this day."

Defazio does regret not being able to cast the late Lauren Woods in his movie. "I would have cast Woody without hesitation as the big-time producer who discovers me," he says wistfully. "I hope he'd be proud of this. I knew he always wanted me to go into this professionally. He was the closest thing that I had to a mentor while I was at

Monmouth, and was one of the first people in my life to encourage me to give it a shot professionally when not many people were doing so in my immediate circle. My family and friends were all playing around a bit, but no one took it seriously. I would always hear people say, 'this is fun for you, but what are you really going to do?' Woody was the complete opposite, and I am grateful to have had his influence on my life. It was a tough thing to lose him, and I wish he had been able to live long enough to see this."

The car stops, and an onslaught of bootleg t-shirt vendors, pushers, and hot dog carts barrage us as we make our way through the clammy night toward the First Union Center. Suddenly, Charlie stops in mid-stride, his eyes fixed at a larger than life figure standing on the steps of what was once known as the Spectrum.

"Tell me that's not the Rocky statue over there," he squeals with delight as

the sight of his idol in bronze comes into view. The story of a young Italian American who takes a few punches on the way to the top is something Defazio clearly identifies with. "I've never seen this before. Can you take my picture next to him?"

"Pleased to meet you, hope you guess my name," screams Mick Jagger from the speaker of a passing car as this writer snaps the disposable camera and Charlie Defazio offers a tentative smile.

He's ready for his close-up. MU

ALUMNI ASSOCIATION SCHEDULES MEETINGS

Alumni are welcome at regular sessions of the board. Meeting dates are March 6 and May 1 (evenings). Come put your two cents in! Call the Alumni Office for time and location.

SCHOLARSHIP WINNERS ANNOUNCED

Allyson Christine Goode and Amy Catharine Luna have been selected by the Awards and Recognition Committee as the Alumni Endowed Scholarship winners for this school year. Both students expect to graduate in 2006. They will receive awards of \$1,000. The non-renewable scholarship is available to children of alumni and recognizes academic achievement, school and community service, and leadership.

Goode, from Highlands, is a graduate of High Technology High School where she was involved in club activities and participated in a distance learning Webmaster course for which she received

college credit. She has an active interest in dance and other performing arts. Her father, Edward, earned a degree from Monmouth in 1986.

Luna, daughter of Randi (Handelong) '75, is from Belvidere. In addition to school activities, such as Key Club, a community service based organization, Amy volunteered with AIDS Awareness, SAAD, Food Pantries, Earth Day Clean-Up, the March of Dimes, and visited nursing homes.

Applications for the scholarship can be obtained anytime from the alumni office and are due by June 30th of each year.

NOMINATE NOW

Please tell us about alumni who you think deserve the prestigious Distinguished Alumni Award. Send a resume and a letter of recommendation describing his or her (or your) accomplishments to the alumni office. The award is made annually to an alumnus who has made an outstanding contribution in a profession or to the betterment of society.

Prior to that position she worked for Franciscan Home Care as a medical social worker. Ruth and her husband of 21 years, Gary, have a child David, 17. Ruth wonders if there are other alumni in the greater Cincinnati area. The family resides West Chester, OH.

CLASS 1974

JOANNE (Kushner) ABRAMS (El. Ed.) has been happy as secretary to the president of Adelman Associates since 1992. Prior to this she was the office manager at Plastic Reconstructive Surgery Associates. Joanne and Robert have been married for 21 years. The couple resides in Rydal, PA.

JAMES J. ASSELTA (Sp/Comm./Thtr.) has been president of his own company, Mortgage Market, Inc., since 1990. Prior to this he was lead singer and guitarist for the Jade Show Band. He and his wife of 14 years, Lyn, have a child, Maya Li, 13. Jim wrote, "It is hard to believe that it has been 28 years since college. I miss the times when I had to think, reflect and figure out where I fit in the Universe. Those times, along with playing guitar, were always the most intense, during my stay at Monmouth. I am so proud that I have managed to live my entire working life working for myself. I had a temporary "hiccup" working three years as an Atlantic City dealer. The 70's certainly made us a rebellious bunch. Lastly, I live in St. Augustine, FL. I still sing and play guitar professionally and have achieved a life long goal of becoming an airplane pilot. Life is good!"

DEBRA (Swan) CHRISTIAN (Cr.Writ. & Art) has enjoyed working as a flight attendant for US Airways since 1981. She writes, " I enjoy traveling, especially throughout France, and bringing the children on all of our trips. We spend a lot of time skiing in Vermont, Aspen and Pocono. Looking forward to someday doing pottery again. Spending time in pottery shop at Monmouth is what I miss most about college. Debra and her husband, of 19 years Dr. EDWARD P. CHRISTIAN (Bio.'79) have two children, Kimberly, 14, and Allison, 8. The family resides in West Chester, PA.

LYNN (Astarita) GATTO (El. Ed.) loves the 30 years she has spent as an elementary school teacher for the Rochester City Schools. She has published a chapter in *Literacy*, as Snake Oil: No Quik Fix. She has been busy. She has two classes left and will begin dissertation for a PhD in teaching and curriculum at the University of Rochester, "Success guaranteed literacy programs- I don't buy it". Lynn is also writing and developing elementary science modules for a scientific educational products company, NeoSci. She resides in Honeoye Falls, NY.

ROBERT KOLODZIEJCZYK (Hist.) has been working for Robert Bosch Corporation as Regional Sales Manager since 1980. His wife, of 25 years, BARBARA BROTZKY (Soc '73) enjoys working for the Warren Hills Regional School District as an instructional aide since 1995. Prior to this position, she worked for House of Good Shepherd as a recreational therapist. The couple has three children, Jared, 21, Jeffrey, 19, a sophomore at Monmouth who plays on the football team, and David 15. The family resides in Washington.

M. KAREN (Longo) THOMPSON (Eng) is a New Jersey Supreme Court Certified Civil Trial Attorney and a partner and member of her firm's Management Committee at the Somerville law firm Norris, McLaughlin, & Marcus, P.A. She spoke on Implications of Laid low & Crippen on October 14, 2002 at the New Jersey Defense Association Products Liability Seminar- What Does the Future Hold? She is also a member of to the New Jersey and New York Bars, the New Jersey State (Products Liability and Employment Law Sections) and is a member of the Supreme Court Advisory Committee on Judicial Conduct. Karen resides in Warren.

CLASS 1975

KARL ARO has enjoyed being executive director since 1997 for the Maryland Department of Legislative Services-Maryland General Assembly; he has worked there since 1979. He writes, "I often see other Monmouth alumni, a A small group in the Washington-Baltimore area." He and his wife of 24 years, Suzanne, have two children, Steve, 14, and Caroline, 7. The family resides in Silver Springs, MD.

PATRICIA (Mora) BAROSKA (Educ. & El. Ed.) and ROBERT L. BAROSKA (Educ. & El. Ed. '76) have been married for 24 years. Monmouth University Planned Giving Office

- Gift annuities touch lives, enrich programs and build a foundation for the future.
- While technically not an investment, they provide life income for beneficiaries and an immediate income tax deduction for donors.
- Gift annuities are a terrific way to accomplish a gift larger than you otherwise could afford.
