Panelists

Monmouth University

Tony MacDonald

Director, Urban Coast Institute

Professor Randall Abate

Director, Institute for Global Understanding

The 26th Annual Conference of the Parties to the United Nations Framework Convention on Climate Change (COP26) is scheduled for November 1–12, 2021 in Glasgow, Scotland. The Convention brings together global heads of state, climate experts, and civil society to identify strategies to accelerate the global response to climate change. The stakes are high. Tony Macdonald, Esq., Director of the Urban Coast Institute, and Prof. Randall Abate, Director of the Institute for Global Understanding and the Rehnitz Family and Urban Coast Institute Endowed Chair in Marine and Environmental Law and Policy, will first provide an overview of COP26's objectives, critical issues, and their expectations for the summit. They will then address the importance of two themes at this year's event: (1) the ocean-climate nexus and (2) climate justice and climate migration.
